

HOW DOES IT SUPPORT TOMORROW'S TECHNOLOGY TODAY?

By: Network Instruments®

The Sixth Annual State of the Network Global Study shows

that I.T. managers across the galaxy need some love. Cloud, Big Data, BYOD? Already deployed. I.T. happy? Not yet. Deployment is one thing, maintaining performance is another. I.T. teams still need the right management systems in place to keep up with the latest technology investments. Blast off with our key findings here:

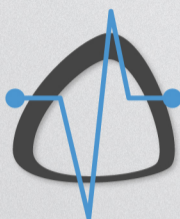

53%

INDICATED MOBILE DEVICES, SUCH AS SMART PHONES, PRESENT THE GREATEST MONITORING CHALLENGE.

Chief application monitoring anxiety?

68% FINDING THE PROBLEM SOURCE.

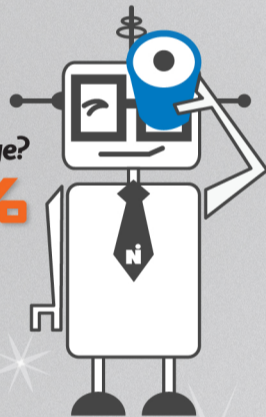

70% OF ORGANIZATIONS HAVE MOVED TO THE CLOUD.

Chief UC management challenge?

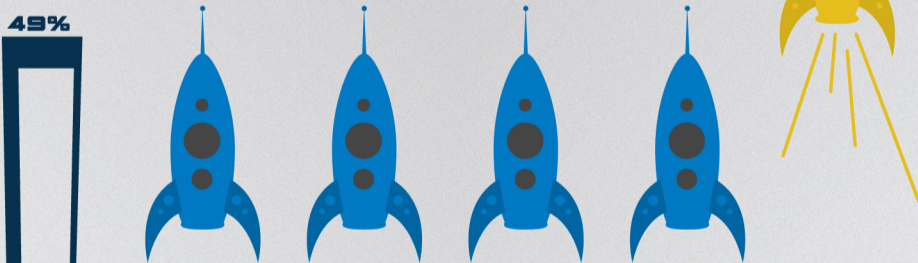

LACK OF VISIBILITY INTO USER EXPERIENCE. **69%**

43% OF APPLICATIONS WILL RUN IN THE CLOUD WITHIN 12 MONTHS.

1 IN 5 ORGANIZATIONS MOVING TO 40 Gb IN THE NEXT 12 MONTHS.

Videoconferencing has gone mainstream

57% ALREADY HAVE
26% HAVE NO PLANS
17% WILL HAVE IN 12 MONTHS

Bandwidth demand will grow over the next two years

49% BETWEEN 26-50%
24% UP TO 25%
15% BETWEEN 51-75%
11% OVER 75%
1% REMAIN THE SAME
