

# JDSU SmartClass™ ADSL-WiFi- Cable Test Gold Package

## Integrate NextGen services quickly and smoothly with the SmartClass ADSL-WiFi-Cable Test Gold Package

As the Triple-Play architecture becomes more complex, service providers and home owners must identify quicker, easier methods for deploying home networks. Several options are available: re-use the phone cabling system, power mains, or coax cabling; lay out new Ethernet wire; or perhaps build a new wireless network.

The JDSU SmartClass ADSL-WiFi-CableTest Gold Package lets you test requirements for performance of digital subscriber lines (DSL) and plain old telephone systems (POTS), wiring maps, customer premises equipment (CPE) configuration, verify WiFi, and troubleshoot data and IP Video services.

## ADSL-WiFi-Cable Test Gold Package

Each SmartClass ADSL-WiFi-CableTest Gold Package includes three easy-to-use handheld testers from JDSU—for both Annex A and Annex B DSL WiFi test environments:

- **SmartClass ADSL:** Easy-to-use field tool for ADSL2+ sync and ping and ADSL1/2/2+ services installation and maintenance
- **TestifierPRO™ Cable Tester:** Test cable, measure length measurement, and verify hub functions in one unit with one-button operation to initiate TELCO, network, and coax modes for diagnostic tests
- **Wi-Net Window Wireless Tester:** Captures and displays essential information regarding identity, functionality, and capability of IEEE 802.11 b and g wireless devices and also detects and connects to wireless equipment, reports signal strength, pings Internet protocol (IP) addresses, and identifies network components

When ordering the SmartClass ADSL-WiFi-Cable Test Gold Package, use these part numbers:
