

Viavi Solutions™ Workshop Course List

Viavi Workshops maximize classroom time by requiring that attendees have a strong grasp of the fundamentals of the technology as prerequisite learning before gaining attendance in the primarily hands-on, face-to-face learning sessions.

These workshops use hands-on lab exercises so participants learn how to test in a real-world environment. The workshops are test set-independent and focus on teaching the students how to become an expert at testing a particular technology and performing specific testing procedures. Students are encouraged to bring the test sets that they use on the job to the workshop sessions. The class size is limited to eight students in order to maximize the hands-on and lab exercise learning experience.
