

Euro DOCSIS Certs for US DOCSIS Units

EURO-DOCSIS BPI+ Certificates

VIAVI is unable to support modifying ONX Instrument characteristics, such as EuroDOCSIS certs and WiFi country codes, without a full evaluation of the purchase chain. All units should be shipped with the appropriate MAC Certificates and WiFi country codes. If this is the issue please work with the TAC assistance center in your area. Our local and regional service centers are not equipped to do these modifications, these MAC certificates are tightly controlled by design. We recommend that you consult with your local sales representative about what units you should purchase for your region/area before purchasing any VIAVI product.

For more information, please contact your authorized local sales provider or our technical assistance center.
