INDUSTRY'S MOST TRUSTED

and widely deployed optical test platform

C- and L-BAND OSA

performance in a pluggable module

Finally...an OSA with the performance you need in the modular platform you trust

Introducing the new mOSA Optical Spectrum Analysis module from VIAVI Solutions. This latest addition to the LightDirect™ family of optical test modules adds full-band OSA performance to the MAP-300 test platform.

For more information visit viavisolutions.com/mOSA

THE LIGHTDIRECT™ FAMILY delivers the industry's widest selection of capabilities in an optical testing platform. These compact modules are used along with the MAP-300 to provide intuitive controls and precision test capabilities.
