# **Optimeter Optical Fiber Meter**

### QUICK CARD

## **Updating Software via USB**

This quick card outlines how to upgrade the Optimeter to the latest software revision using a USB Flash Drive. Note: the software must be downloaded to a PC and **extracted** to a formatted 2GB to 16GB USB flash drive. If the downloaded file is copied directly to the USB flash drive, the upgrade will fail.

### **EQUIPMENT REQUIREMENTS**

### **Equipment Requirements:**

- Optimeter
- 4GB to 16GB USB Flash Drive
- Laptop or Personal Computer with Internet Access

Figure 1: Equipment Requirements

# FORMAT USB FLASH DRIVE (OPTIONAL)

Press the **ON/OFF** button to turn on the test set.

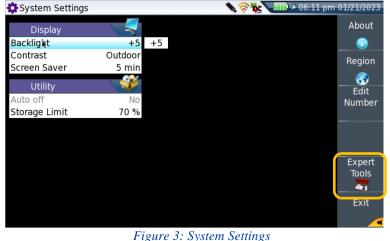

- 2. Press the **HOME** button display the home screen.
- 3. Tap the **SETTINGS** icon in the Home Screen to access System Settings.
- Insert the USB Flash Drive into a USB port on the top of the Optimeter test set.
- 5. Tap the **Expert Tools** soft key.
- 6. Tap Utilities to display USB soft keys.
- 7. Tap the **Usbflash Format** soft key

  Usbflash and Confirm to format the Drive.
- 8. Tap the **Eject USB** soft key and remove the USB Flash Drive from the USB port of the test set.

### QUICK CARD

### DOWNLOAD ARCHIVE AND EXTRACT TO USB FLASH DRIVE

- On Laptop or Personal Computer, open an Internet browser and navigate to the software update portal for your test set:
  - https://optimeter.updatemyunit.net/
- 2. Click on a Flag icon and run platform software from the nearest server:
  - ► Europe Server
  - North America Server
  - ► Singapore Server.
- 3. **Note:** Select "Run" or "Open file" to extract the upgrade files to a USB drive. If you save the .exe file directly to the USB flash drive, the update will fail.
- 4. Enter or browse to the path of the USB Stick and press the OK button to extract update files to the USB Flash Drive.
- Eject and remove the USB Flash Drive from the Laptop or Personal Computer.
