

Training Outline

VIAVI

Workshop Course List

VIAVI Workshops use hands-on lab exercises so participants learn how to test in a real-world environment. The workshops are test set-independent and focus on teaching the students how to become an expert at testing a particular technology and performing specific testing procedures. Students are encouraged to bring the test sets that they use on the job to the workshop sessions. The class size is limited to eight students in order to maximize the hands-on and lab exercise learning experience.
