

**3Z WASP Antenna Monitoring System
End of Sales as of 02 July 2021**

Last Order Date: 01 June 2021

Last Shipment Date: 02 July 2021

Date: 05 MAR 2021

Dear Customer,

As a purchaser of 3Z Telecom (now Viavi) products you have experienced our commitment to quality and industry leading performance firsthand. We thank you for your business and it is our intention to continue to provide you with test solutions that offer ever-increasing value.

We would like to inform you that sales and shipments of the WASP Antenna Monitoring System and related products will be discontinued after 02 July 2021. The affected part numbers include:

3Z-AWS-1000 WASP Antenna Monitoring Device
3Z-AWD-1000 Antenna Monitoring Data Collector
Related accessories

As technology advances, new challenges arise and more efficient solutions present themselves. In that light, Viavi is pleased to announce the replacement of the WASP Antenna Monitoring System with our new loA – IoT for Antennas Monitoring System. By providing each loA sensor with the ability to communicate over LTE CAT-M1/NB-IoT cellular networks, data collection can now be centralized in the Cloud with no need for data collection hardware at each cell site. Simple installation of loA sensors allows for real-time antenna alignment monitoring and alarming on all wireless network antenna arrays. Data captured with loA's patented monitoring technology is aggregated in the cloud, allowing operators to remotely view the history of all physical antenna alignment changes. Our sales and technical solutions teams are currently working with customers to approve the loA platform ahead of General Availability. Please feel free to contact your local Viavi Sales representative for more information or to request a demo.

Support: Viavi will continue to provide TAC and Instrument Service Center support for the WASP Antenna Monitoring System until 02 July 2024.

Final Purchase Opportunity:

Material availability for the WASP is necessarily limited, so please contact your Viavi representative if you wish to structure a last time buy of the WASP Sensors and/or Data Collectors while supplies last. We recommend that all orders be placed by 14 May 2021 to improve prospects for availability. We will no longer accept orders after 01 June 2021.

We thank you for your business and look forward to serving you in the future. If you have any questions regarding this EoM Notice, please contact your Viavi Sales or Customer Service Representative.

Yours sincerely,
