Subject: 8800SX End of Manufacture

For well over a decade, the [8800SX Digital Radio Test Set](#) has been the go-to service monitor solution for busy technicians on the go. The 8800SX was truly the first of its kind, with its large, color touchscreen Graphical User Interface, small form factor with incredible battery life, yet equipped with the VIAVI industry-leading Auto-Test library. The 8800SX quickly became a popular service monitor for OEMs and end-users alike, around the world.

The projected End of Manufacturing date for the 8800SX is March 27, 2026. This projected date is based on current demand and is subject to change significantly based on sales opportunities. We will continue to accept orders until further notice.

The [CX200 Communications Service Monitor](#) is the recommended replacement for the 8800SX. Building on VIAVI's Aerospace and Defense legacy, the CX200 delivers best-in-class performance and reliability in radio test equipment.
