Subject: VIAVI Certifier

Dear Ed,

Belden has completed the evaluation of VIAVI Certifier Series cable certifier. We are pleased to announce the approval of this test equipment with firmware 6.0 or higher for use in channel and permanent link performance verification up to 500 MHz of Belden's IBDN 1200, 2400, 4800 and 10GX cabling systems.

The evaluation was made in our laboratories using the VIAVI Certifier using OS software version 3.6. The results obtained correlate within the expected accuracy for Level IIIe field testers. The Cat 6A permanent link adapters and cords as described in Note 1) may be used.

Note 1) NGC-4500-6ALKIT2 – pair of CAT 6A permanent link kits: each consisting of a CAT 6A permanent link adapter NGC-4500-6ALINT1 and a Permanent Link test cord NGC-4500-6ALCORD2 may be used (included with standard Certifier kits).

We look forward to continued cooperation with VIAVI Solutions in the future to evaluate new software updates and product features as they become available.

Sincerely,

Ronald L. Tellas
