Do not allow material to contaminate ground water system. Do not flush into surface water or sanitary sewer
system. Prevent further leakage or spillage if safe to do so. Try to prevent the material from entering drains or
water courses.
6.3 Methods and materials for containment and cleaning up
Prevent further leakage or spillage if safe to do so. Sweep up and shovel into suitable containers for disposal.
Clean contaminated surface thoroughly. Pick up and arrange disposal without creating dust. Keep in suitable,
closed containers for disposal. - Caution: Water in the container will lead to increased pressure and risk of
explosion. Dispose of as hazardous waste in compliance with local and national regulations.
