

Enterprise Integration Configuration

Fully integrating a performance management solution into a complex enterprise IT environment can be a daunting task. Why face it alone and risk misconfiguring a vital investment? Get help from the experts.

Did You Know:

Companies that take advantage of Viavi Solutions® Consulting use twice as many performance management features on average

The next step up from our Quickstart package, Enterprise Integration Configuration offers you the opportunity for a more robust installation and configuration by trained, knowledgeable professionals. Starting your program with correct configuration provides an instant return on investment while ensuring high long-term value by fully utilizing deep platform features often overlooked without expert collaboration.

How It Works

This service addresses fundamental and strategic configuration needs with respect to your Viavi Solutions products and overall business goals. Organizational goals will be documented, implementation plans will be created, and the configuration will be completed to your specifications. Up to five of your staff members will participate in a knowledge transfer on both the operations and the process. The Virtual Service includes three 4-hour remote sessions, while the On-Site Service is up to 3 days.

Relates to the Viavi Observer® Analyzer, Observer GigaStor®, Observer Apex™, Observer Management Server (OMS), Observer Infrastructure (OI), and Observer Matrix
