Barrel Assemblies (BAP)

Some of our FBPT Series tips require a BAP, or barrel assembly. A BAP contains a common set of optics that can be used with multiple hollow tips. This approach makes many common tips more economical. Some tips contain their own optics and do not require a BAP. Typical examples of tips containing optics are long-reach tips and tips with a 60-degree angle for hard-to-reach areas. The following pages indicate which tips require a BAP and which do not.

FBPT Probe Tips

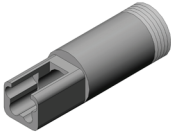

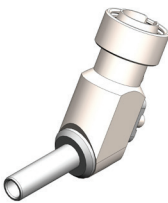

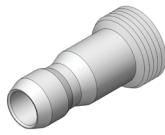

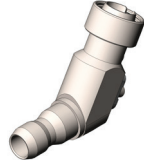

The FBPT Series probe tips attach to the [FiberChek](#) and [FBP-P5000i](#) Inspection Probes. Some of them can also be connected to the [FiberChek Sidewinder](#) with an adapter for use with simplex inspection. FBPT tips are primarily used for bulkhead inspection, but patch cord tips are also available for certain connectors.
