1/3/2026

---

### Description

These firmware versions are the initial release of the OSPREY. **New Features**

- General: Initial release

### Improvements

- General: Initial release

### Notification

- The Osprey simulates L1 GPS satellite transmissions to obtain GPS integrity that meets the minimum operating requirements for most system testing. Currently, it does not simulate WAAS satellite correction.
- Always ensure that the tablet or phone paired with the Osprey is operating with the latest version of the app available for Android and IOS by [Clicking Here](#).
