INSPECT THE BULKHEAD

- 1. Insert the **Bulkhead inspection** tip into the Bulkhead.
 - ► For SC-APC and PushLok Bulkheads, align the keys on the inspection tip and the bulkhead connector.

4. Adjust the **Focus Control** wheel of the P5000i microscope to focus the optical fiber. The left vertical bar on the screen indicates the level of focus adjustment. The higher the level, the better the focus. The screen will display a line in the focus bar where the optimal focus lies for that image. Focus the image until the bar is as close to the line as possible.

- ▶ Press the **Test** button on the P5000i.
- ► Press the **Menu** button and tap the **Test** soft key on the OLP-87.
- 6. A green screen indicates a **PASS** result. A red screen indicates a **FAIL** result.
- 7. Tap the **Back** button on the OLP-87 to return to the Live fiber view.
- 8. If the test failed, clean the fiber end-face and re-run the inspection test. Repeat until it passes.
