Quick Card

T-BERD®/MTS 5800 Network Tester
Updating Software via Internet

This quick card outlines how to upgrade the SmartClass 4800 or T-BERD/MTS 5800 to the latest software revision using a wired LAN connection with internet access. **Note:** Software may not be updated via Wireless LAN or Mobile hotspots.

**Equipment Requirements:**
- Wired Internet Connection
- CAT5E or better cable.

**Connect to Internet:**

1. Plug the T-BERD/MTS test set into AC power. You cannot update the software while running on battery.

2. Using CAT5E or better cabling, connect the T-BERD/MTS 5800 Ethernet Management Port on the side of the unit to a LAN port providing internet access.

3. Tap the **System icon** in the Status Bar at the top of the display to show the **System menu**.

4. Tap the **Network Icon** to show the **Network menu**.

5. Tap the **LAN icon** on the left screen side. If using DHCP, set **IP Mode** to DHCP and wait until unit obtains an IP address; otherwise set **IP Mode** to **Static** and configure a static IP address.

Upgrade the Test Set:

1. Tap the **System** icon in the **Status Bar** at the top of the display to show the **System menu**.

2. Tap the **Upgrade Icon** to show the Upgrade menu.

3. Select “Network” for the upgrade method.

4. Tap the **Start Upgrade** button.

5. Tap and follow screen prompts to complete the software upgrade.
