

Sikorsky Helicopter Aircraft Fuel System Support Equipment

The following is a list of ground support equipment required for testing the Sikorsky H64 Apache / UH60 Black Hawk / HH60 Pave Hawk / MH60 Knight Hawk / S70 Fire Hawk Fuel Quantity Indicating System.

PSD90-3 AC/DC | Order Code 22160648

New AC/DC Capacitance Test Set contains all the necessary functionality to measure and simulate capacitance and perform insulation resistance and continuity tests on the aircraft wiring. Includes functionality to automatically alert and manually test for contaminated fuel probes.

Please refer to the PSD90-3 product data sheet for more information.

PSD90-3 AC/DC replaces the PSD60-1AF and PSD90-1C/61

PSD60-1AF | Order Code 699 | Legacy Part Number 01-0605-00 | NSN 6625-01-297-5305

The PSD60-1AF is designed to calibrate and troubleshoot any AC capacitive fuel, oil or LOX quantity system. The test set is utilized extensively by rotary and fixed-wing aircraft operators around the world.

Or

PSD90-1C/61 | Order Code 878 | Legacy Part Number 01-1000-61 | NSN 6625-01-297-5305

The PSD90-1C is a universal AC/DC Capacitance Test Set. It contains all of the necessary functionality to measure and simulate AC or DC capacitance, and perform insulation resistance and continuity tests on the aircraft wiring. An aircraft specific interface is required.

PSDAF-113 | Order Code 57294 | Legacy Part Number 55-0605-01 | NSN 5995-01-390-6896

The PSDAF-113 is a T-Cable that connects at the signal conditioner. It allows for measurement and simulation of tank units. The PSDAF-113 replaces the PSD40-552 and the PSD40-585.
