

VIAMI CARBON FOOTPRINT

Type of Emission	2017 CO ₂ Emissions (Tonnes)	2018 CO ₂ Emissions (Tonnes)
Direct emissions (Scope 1)	1,330	1,528
Purchased electricity (Scope 2)	18,522	20,561
Travel (Scope 3)	4,620	4,559
Total	24,472	26,649

VIAMI continued emphasis on energy efficiency, both in our products and business practices, has resulted in significant reduction of our carbon footprint over the years.

Since 2012, Viavi has reduced its CO₂ emissions by 39%. A slight increase in CO₂ was seen between 2017 and 2018 which can be attributed to acquisitions VIAMI made which included 1 large mfg site, 2 assembly sites, and number of smaller sites.

2018 will establish a baseline for the next 3 years as we continue to grow and scale the business. Our Goal is to establish a +-3% YOY CO₂ Emissions.

Implemented Sustainability Projects:

- Manufacturing Equipment Upgrades
- Lighting Improvements
- HVAC Upgrades
- Smart Energy Purchasing
- Water Conservation
- Removal of steam at a manufacturing site
