

Quick Card

T-BERD[®]/MTS 5800 Network Tester Updating Software via Internet

This quick card outlines how to upgrade the SmartClass 4800 or T-BERD/MTS 5800 to the latest software revision using a **wired** LAN connection with internet access. Please note that **Software may not be updated via Wireless LAN or Mobile hotspots.**

SmartClass 4800 or T-BERD/MTS 5800 units with software that is more than 2 major releases old, should not be updated via Internet. Please follow instructions on the **Updating Software via USB** quick card to set your unit up to the current software, two major revisions at a time.

Equipment Requirements:

- Wired Internet Connection
- CAT5E or better cable.

Connect to Internet:

1. Plug the T-BERD/MTS test set into AC power. You cannot update the software while running on battery.
2. Using CAT5E or better cabling, connect the T-BERD/MTS 5800 Ethernet Management Port on the side of the unit to a LAN port providing internet access.
3. Tap the **System** icon  in the **Status Bar** at the top of the display to show the **System menu**.

4. Tap the Network Icon  to show the **Network menu**.
5. Tap the **LAN** icon on the left screen side. If using DHCP, set **IP Mode** to **DHCP** and wait until unit obtains an IP address; otherwise set **IP Mode** to **Static** and configure a static IP address.
