

# **Application Software guide**

# Overview

## **Application Software for CellAdvisor**

#### JDViewer

Managing and analyzing the result data or editing the built-in table and parameter.

#### JDRemote

Remote Controller Software

#### JDMapCreator

Application software for mapping function of JDSU's Base Station Analyzer family

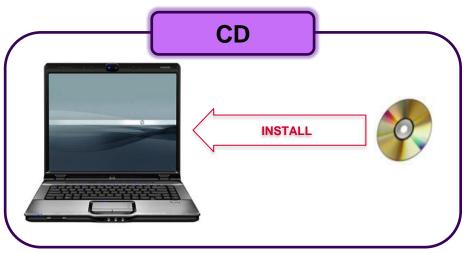

#### JDPowerMeter

Stand-alone Power measurement solution with JD730A and JD730B Power Sensors

### How to install

# **JDViewer**

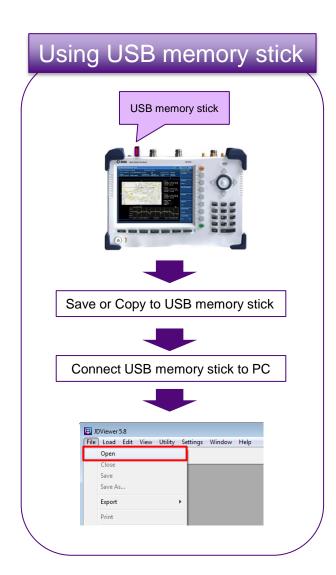

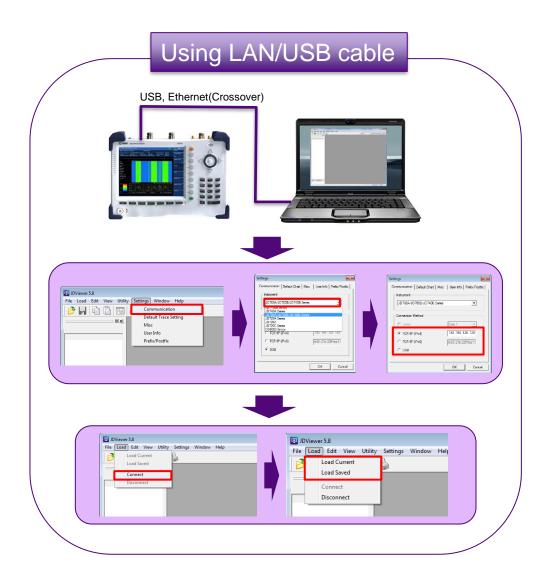

#### **JDViewer 5.8 - Introduction**

- JDViewer is a dedicated application software of Viavi base station test portfolio for post-processing measurement results.
- Available Products :
  - Cable Antenna Analyzer
    - JD723A /JD725A
    - JD724B
    - JD720C Series
  - Base Station Analyzer
    - JD7105B/JD7106B
    - JD740A Series
    - JD740B/JD780A/JD780B Series

## **JDViewer 5.8 - Connectivity**

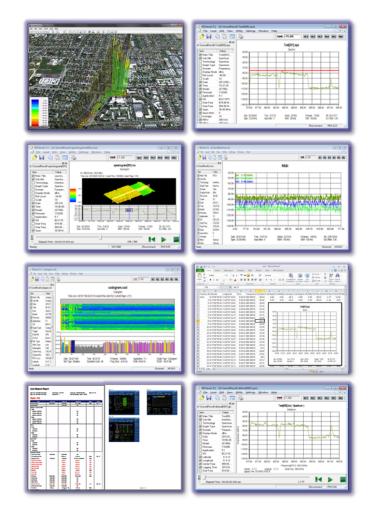

### **JDViewer 5.8 - Functions**

## Trace Analysis Marker •Single/Multi Limit Line **Chart Conversion** •VSWR-DTF-Cable Loss **Data Exporting** •Export as Data / Image •Export as Google Map/Earth **Data Replay** Spectrum Logging Spectrogram **Result Comparing** •Compare the Auto Measure Results **Making Report**

Customize the Measurement Report

# **JDRemote**

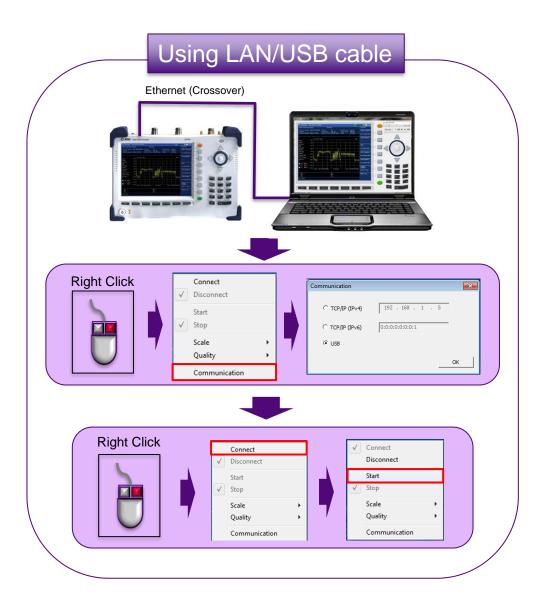

#### **JDRemote 2.0 - Introduction**

- JDRemote is a windows client to remote control the CellAdvisor.
- Available Products :
  - JD720C Series
  - JD740/780A,B Series

# **JDRemote 2.0 - Connectivity**

# **JDMapCreator**

## JDMapCreator 1.4 - Introduction

 JDMapCreator is dedicated application software for mapping function of Viavi's Base Station Analyzer family.

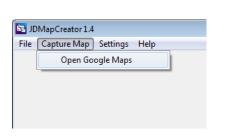

## JDMapCreator 1.4 – How to create the map file

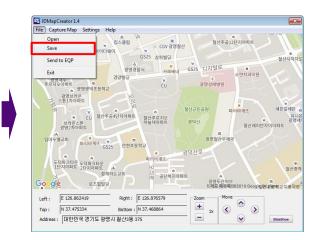

- Select Map type
  - Settings Map Layers Multiple or Single (Default setting is 'Single' map)
    - Multiple map : Support Zoom In/Out mode

Capture/Save Map

# **JDPowerMeter**

#### JDPowerMeter 3.4 - Introduction

 JDPowerMeter is Viavi's Application Software enabling 730A and 730B series power sensors as stand-alone power measurement solutions.
With JD73XX power sensors, it provides following functionality.

**Terminating Power Sensor** 

# JDPowerMeter 3.4 - Connectivity

#### JDPowerMeter 3.4 - Functions

#### **Stand-alone Measurement**

- Average & Peak Power
- CCDF
- Pulse Power
- Logging

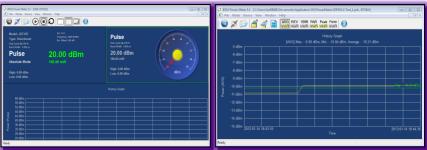

#### **Applicable in History Graph**

- Save/Load the History Graph
- Export as Data(\*.csv )/Image(\*.bmp)

#### **Making Report**

• Customize the Measurement Report

# **7.1.7.7.1**
