VIAVI APM-424(V)4

Interrogator/Transponder Test Set (Including Mode S ELS/EHS) (NSN: 6625–01–600–6784)

Easily accommodates a variety of aircraft, ground and ship platforms to test Transponder and Interrogator performance including Mode S Elementary and Enhanced Surveillance

The APM-424(V)4 is a performance and capability upgrade to the TS-4530 and APM-424 test sets. The APM-424(V)4 is fully compliant with DoD AIMS standards for testing Mark XIIA performance of Mode 4 equipment, DO-260B ADS-B Out performance, and ICAO Annex 10 international standards for Mode S ELS/EHS performance.

The APM-424(V)4 closely replicates legacy operation for utilization of existing procedures, making the APM-424(V)4 a cost effective, highly accurate upgrade to fielded test sets.

The 20-character 4-line display provides for easily viewable data and parametric measurements as required for Mode S Elementary and Enhanced Surveillance testing. For legacy test modes, the menu structure and displayed data format have been retained so that minimal changes are required of fielded procedures.
